

Made in Singapore: Wise's Multi-Currency Debit Card

The Wise multi-currency debit card aims to help customers avoid expensive fees typically associated with credit cards, and eliminates the need to exchange large amounts of physical cash when travelling abroad.

Customers can hold and convert money across more than 40 currencies, and use their card for payment in over 160 countries. Unlike traditional credit cards, the Wise multi-currency debit card uses the mid-market exchange rate with transparent, low fees and avoids levying hidden markups.

The card is targeted at global travellers, expatriates, and cross-border consumers who want cost-effective spending and real-time money management. Wise has issued over 11 million of its debit cards across 42 countries since 2019.
