

Measuring just 38mm in diameter and weighing about 1.8kg, the Dyson PencilVac's cleaner head uses four soft conical brush bars to prevent hair tangles and clean in all directions, while LED illumination helps reveal dust. This makes it ideal for quick, everyday cleaning around the home, as it can fit into tight and crowded spaces that bigger vacuums cannot reach.

Dyson's R&D team designed the PencilVac's 38mm-wide body — matching the widths of the company's Supersonic hair dryer handles — after years of research. This size strikes the best balance between usability and accommodating motors and electronics.

## Made in Singapore: Dyson's PencilVac™

The Dyson PencilVac is a cordless vacuum cleaner engineered to clean hard-to-reach spaces. Its slim, lightweight design addresses user frustrations such as limited manoeuvrability and difficulty cleaning edges.
