

The Resmed AirSense 11 delivers optimally measured pressurised air to keep the user's airway open during sleep, preventing snoring and breathing interruptions. The machine also offers monitoring, coaching, and real-time support through Resmed's myAir app, making sleep therapy more personalised.

The AirSense 11 is the first major CPAP device to include the female-specific "AutoSet for Her" algorithm, eliminating the requirement for a separate machine. This algorithm adjusts airflow to meet the unique physiological needs of women, by providing a dedicated mode that tailors therapy within a single device.

## Made in Singapore: Resmed's AirSense™ 11

Designed to help those with sleep apnoea, Resmed's AirSense 11 is an advanced continuous positive airway pressure (CPAP) device that automatically adjusts pressure based on breathing patterns. This helps those with sleep apnoea enjoy a more restful and healthier night's sleep.
