

The Nature Conservancy: Practical Research for Impact

Triple-Benefit Research

Leverage core expertise in world-class research to inform practical conservation and nature-based solutions, and developing strategies to advance NbS.

High integrity carbon impact

Protection, restoration, and sustainable use of biodiversity

Safeguard, empower, and engage local communities through increased climate change resilience and adaptation

Business Collaborations

Development of the Blue Carbon Explorer with Planet Labs – a digital mapping tool that identifies global blue carbon potential

Partnership with Syngenta to design and scale innovations for agricultural sustainability

Provide unique sustainability solutions for businesses

“TNC launched its new office in Singapore in 2023 to serve as a global centre for innovation, partnerships and science to scale up conservation and climate impact across the Asia Pacific region. TNC also aims to support Singapore in achieving its climate and sustainability aspirations - especially around green finance, carbon markets and corporate sustainability.”

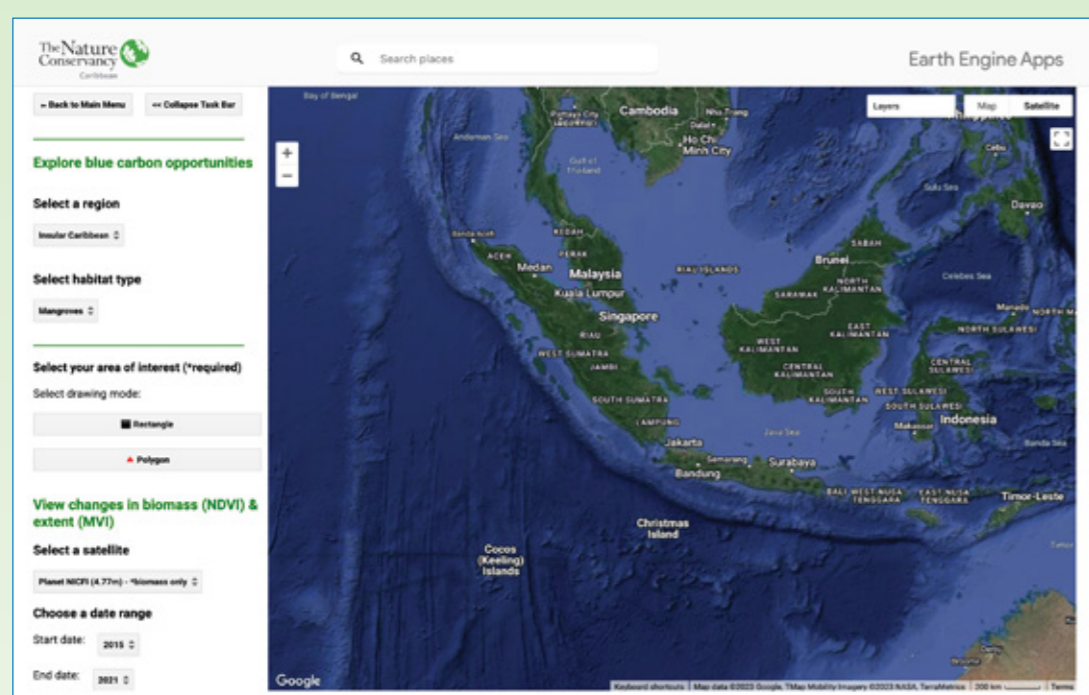

Eddie Game
Lead Scientist & Director of Conservation, Asia Pacific, TNC.

Projects

Blue Carbon Explorer

About

TNC partnered Planet Labs to develop the Blue Carbon Explorer, a digital mapping tool for global blue carbon potential. It uses data from drones and satellites to pinpoint vital areas for coastal ecosystem restoration and protection.

Impact

- Unveils hidden mangrove and seagrass zones for potential development
- Empowers key stakeholders with data-driven insights for habitat conservation
- Amplifies global conservation efforts through the integration of collected data and advanced AI techniques

SCeNe Coalition

About

The Southeast Asia Climate and Nature-based Solutions (SCeNe) Coalition is a collaboration between eight leading NGOs with an established presence in the region. The Coalition aims to accelerate and increase demand and supply of high-quality, high-integrity, triple-benefit NbS across the region. The Coalition’s secretariat is hosted in Singapore by TNC.

SCeNe Coalition’s three key workstreams

The NbS Tool

NbS Portfolio

NbS Incubator

Impact

- Expediting and scaling NbS for climate projects through the NbS Incubator
- Improve operational efficiency and provide assistance to projects through assessments, project design, and technical support
- Developed NbS tool (launched at COP28) to map crucial data on carbon, biodiversity and community benefits of an NbS project
